welcome to twisted metal™

It has been a year since the last Twisted Metal tournament and sections of Los Angeles are still smoking. Citizens who thought they'd survive in the city's safety zones quickly learned that concrete and steel offered no protection from Calypso's demented contest. Twisted Metal has destroyed L.A.

My name is Axel. For 20 years I have been trapped in my own vehicle—a prisoner stretched out, abandoned, and in constant agony. I have come to L.A. in search of Calypso, following the rumors that those who win Twisted Metal are granted anything they request. There is no greater prize than freedom, and when I win, I'll walk the world as a whole man... not this deformed creature.

But Twisted Metal has moved on, and I find only the rotting corpse of a once great city. This year the competition has gone global, to the roofs of New York, the open fields of Holland, and deep inside the winding subways of Hong Kong. Nothing will stop me from destroying my opponents and fulfilling my dream.

I regret that I must kill to be free. Their deaths will not be fair.

But neither is my life.

game views

Your driving view may be altered during game play by pressing the SELECT Button and UP or DOWN Directional Buttons. There are three different Game Views available in a 1 Player Game: CLOSE CHASE, FAR CHASE, and HELICOPTER. In a 2 Player Game, pressing these buttons will toggle the split screen view from a vertical to horizontal format.

REAR VIEW MIRROR: Pressing the SELECT Button and the RIGHT Directional Button toggles the Rear View Mirror ON or OFF.

WEAPON HUD DISPLAY: Pressing the SELECT Button and the LEFT Directional Button toggles your HUD Display between a Weapon List HUD and a Weapon Icon HUD. As their names imply, your weapon pick-ups are displayed either in a list or by icon. All features can be individually turned ON or OFF. In the Weapon Icon HUD, the RADAR SCREEN is not available.

RADAR: The Radar Screen appears when the Weapon List HUD is active. The GREEN CROSS in the center of the Radar Screen is your position, the COLORED DOTS are enemy vehicles, the FLASHING DOTS mean the enemy vehicles are located above or below your present position, and the GREEN ARROWS, which appear along the outer edges of the Radar Screen, show the general direction of enemy cars which are out of range. Underneath the Radar Screen appears the name and health bar of the enemy closest to you.

LIVES LEFT: The number of lives remaining appear only in Tournament Mode. You begin the Tournament with 3 Lives.

ADVANCE ATTACK ENERGY BAR: This energy bar indicates when you can execute an Advance Attack (see pg. 8 for an explanation of Advance Attacks.)

where to begin

1 PLAYER: You have three choices in a 1 Player Game—TOURNAMENT, CHALLENGE MATCH, and PASSWORD.

TOURNAMENT: A Tournament Game consists of an eight level game. To clear a level you must destroy all your opponent vehicles. Enemy vehicles are automatically chosen and their numbers increase with each level successfully passed. The Tournament continues until all your lives have expired or until you have completed all levels.

After choosing a Tournament Game you must select your vehicle. Press the Directional Buttons LEFT or RIGHT to display a vehicle and press the **X** Button to select it. To view details and handling information about a particular vehicle, press the Directional Button DOWN to "Car Info" and press the **X** Button. To return to the Select Car

Screen press any button. Descriptions of all vehicles may be found in this manual beginning on pg. 14.

Players who complete all eight levels of the game will be rewarded their ultimate wish, compliments of the mighty Calypso.

Once the game loads, you are presented with the Title Screen, where you can choose 1 PLAYER, 2 PLAYER, or OPTIONS. Press the Directional Buttons LEFT or RIGHT and press the **X** Button to make your selection. If no selection is made in 30 seconds, a self-running demo will begin. Press any button to return to the Title Screen.

CHALLENGE MATCH: In a Challenge Match you first select a Battleground (described on pg. 12-13), then your vehicle, and then your opponents. Depending on the level, you may select up to six enemy cars by pressing the **X** Button. Once you have chosen your opponent(s) press the Directional Button DOWN to "Start Match" and press the **X** Button.

Unlike a Tournament Game, you do not progress to a new battleground once you have defeated all opponents. Instead you begin a new match on the same battleground with the same vehicles.

PASSWORD: Once a level is completed in Tournament Mode, a password is awarded at the start of the next level (you may press START to pause the screen). To enter a password, press the Directional Button DOWN to "Password", then RIGHT to the first box, and then press the corresponding **■ ▲ ● ✖** Buttons. Once all six buttons have been entered, press START.

2 PLAYER: You have two choices in a 2 Player Game—CHALLENGE MATCH and CO-OP TOURNAMENT.

CHALLENGE MATCH: In a Challenge Match you fight head-to-head with another player. The match ends when one player successfully destroys the other vehicle, after which the match resets for another battle. There are no other enemy vehicles in a Challenge Match. After choosing a Challenge Match one player selects a Battleground, then both players pick out their vehicles.

CO-OP TOURNAMENT: A Co-op Tournament is similar to a 1 Player Tournament except the two players may choose to help or destroy one another. However, BOTH players share a total of six lives. When one player gets killed, both vehicles are returned to their original starting position, though the game does not start over. As in a 1 Player game, to clear a level you must destroy all enemy vehicles.

OPTIONS: There are six options available—DIFFICULTY, MAP, KEYPAD 1, KEYPAD 2, AUDIO, and HISTORY.

DIFFICULTY: There are three levels of difficulty—EASY, MEDIUM, and HARD. In Easy Mode, only levels one through four can be played in a Tournament.

MAP: Turns the spinning level select globe ON and OFF.

KEYPAD 1 and KEYPAD 2: Changes the mapping of Weapon Controls for both control pads. You may choose from STANDARD, RUN N' GUN, CONTROL FREAK, and DEADLY FORCE.

AUDIO: Controls the MUSIC LEVEL, SOUND EFFECTS LEVEL, and SOUNDTRACK.

HISTORY: Lets you view the continuing story of the Twisted Metal™ Tournament, as well as game credits.

attacks and weapons

In addition to built-in machine guns and the weapon pick-ups (described on the next page), there are three categories of attacks that can be executed with each vehicle: **SPECIAL ATTACK**, **ADVANCED ATTACKS**, and **COMBO ATTACKS**.

SPECIAL ATTACK: Special weapon attacks are unique to each vehicle and are described in "The Vehicles", beginning on Pg. 14. Special weapons are unlimited, however they can be depleted and must be allowed time to recharge. In general, a vehicle's special weapon attack does more damage than conventional weapon pick-ups.

ADVANCED ATTACK: Advanced Attacks and maneuvers are performed by pressing different sequences of the Directional Buttons. Since your vehicle's direction and acceleration may be affected when executing an Advance Attack or maneuver, be sure to familiarize yourself with controlling your car before you attempt them. Advanced Attacks are extremely useful and allow you to attack your enemy when you no longer have any weapons. They also enable your car to maneuver in unusual ways, creating combination attacks when used with other weapons (see Combo Attacks on pg. 10). Practice with the Advanced Attacks and maneuvers listed below. There are many possible Advanced Attacks in Twisted Metal™ 2. Most Advance Attacks require 3 or 4 button sequences, and some require more.

| ATTACK/MANEUVER | DIRECTIONAL BUTTON SEQUENCE |
|-----------------|-----------------------------|
| FREEZE BURST | ← → ▲ |
| HIGH JUMP | ▲ ▲ ← |
| REAR ATTACK | ← → ▼ |

COMBO ATTACK: These special moves create the first-ever car combo attacks! Combine Advance Attacks and maneuvers with your weapon pick-ups and watch your enemies beg for mercy. See pg. 10 for examples of the many possible combinations.

Weapon pick-ups

FIRE MISSILE:

These are standard projectile missiles with slight homing capability and moderate damage rating.

POWER MISSILE:

These are the most powerful missiles, causing major damage to enemy vehicles and the fighting environment.

RICOCHET BOMB:

When released, these bombs bounce around in the environment until they strike a vehicle (including yours!). The longer the bomb is in play, the more powerful it becomes. Good for pushing your enemies around!

LIGHTNING:

Only available in certain battlegrounds, the lightning originates from a powerful electrical source. Be sure you're far away, or the results can be shocking!

FIRST AID KIT:

These pickups are essential for maintaining your health during a battle and may be limited, so use them before your enemies do!

HOMING MISSILE:

Capable of zeroing in on an enemy vehicle from a distance.

NAPALM:

An enemy struck by napalm instantly catch fire. But watch out! Burning cars can ignite other cars and objects they touch!

REMOTE BOMB:

The most powerful of all weapon pick-ups, remote bombs do not explode until the fire button is pressed again. A flashing dot on your HUD indicates a bomb not yet detonated. Great for laying an explosive trap!

NOTE: All vehicles can carry up to 24 weapons before reaching maximum capacity.

combo attacks

Twisted Metal™ 2 is an open environment game, so there are many possible combos and strategies to invent and discover. Combo Attacks and Maneuvers involve a combination of Advance Attacks (see pg. 8) and special and standard weapon pick-ups. Experiment, practice, and show your opponent why you will be the winner of this year's Twisted Metal™ Tournament!

- 1) Freeze your enemy (an Advance Attack) then
- 2) Plant a remote bomb (a weapon pick-up) next to him.
- 3) Back up and detonate the bomb. Major damage!

- 1) Wait on the edge of a cliff or roof until your enemy comes after you.
- 2) Jump straight in the air (an Advance Attack) as his vehicle tries to slam into you.
- 3) The enemy will race under you and over the edge! Try placing a bomb under you before jumping!

- 1) Combo attacks can also be performed with your vehicle's special weapon. As Grasshopper, activate your special weapon (Leap n' Slam).
- 2) While in the air, freeze your enemy (an Advance Attack).
- 3) After you have slammed down on your frozen enemy launch a power missile. A demolition dune buggy!

pedestrians

Some say hitting pedestrians is bad form... but Twisted Metal™ 2 has the highest spectator death toll of any contest in human history. So help keep the tradition alive!

SKATEBOARDER:
Show him the true meaning of thrashing.

TWISTED GROUPIE:
An excited fan of Twisted Metal™, he's just DYING to be noticed!

ARCTIC HUNTER:
This time he'll really be on ice.

SWIMMER:
Blood is thicker than water.

SANTA CLAUS:
You've been bad this year. VERY bad.

BUSINESS MAN:
Splatter him all over Wall Street!

MIME:
Don't worry, if you hit him. No one will hear him scream.

BACK ALLEY CHEF:
He may be quick with a knife, but how is he on his feet?

ARTIST:
I hear red is his favorite color.
