## **GLENN HODDLE'S SOCCER**

Now enjoy all of the excitement of one of the world's most popular sports on your Amstrad computer. Glenn Hoddle's Soccer provides you with a challenging and stimulating alternative to bruised shins and toilet rolls.

Whether your a Tottenham supporter or not, Glenn Hoddle should certainly inspire you to a top class game against either your computer, which plays an extremely strong game; or your friends, who will probably put up less opposition.

### **MENU SELECTION**

Either joystick may be used to change the options at the start of each game.

The word "home" in the top option will be highlighted in white, this may be changed to "away" by moving the joystick left or right.

You may change the other options by moving the joystick up or down and following the highlight.

The first two options allow you to change the side you play on. The third and fourth options allow you to decide if the computer will help the player on each team or not.

The other options change the skill level and duration of the game. Pressing the joystick trigger will start your chosen game.

### **JOYSTICK CONTROL**

Pressing the trigger when in possession of the ball, will pass or shoot in the direction the player is running.

If you are not in possession, pressing the trigger while holding the joystick over in any direction will pass control to and change the colour of your nearest player in the direction of the joystick. ▶

If the joystick is central when you press the trigger, control will pass to your player nearest the ball. This player will also run towards the ball until you move the joystick and take-over control.
