XAIN - YOUR MISSION

Galactic High Command have issued a directive for you to rid the Galaxy of all of the Federation's infiltrators. You must chose which planets to defend, and in which order. Once on a planet you are alone against the hoards of the Federation ... armed with single-shot laser you will find arms pods from time to time which will give you - if rather unpredictably! - different weapons to fight with. Succeed in your mission on each planet and you will be able to go on to the next one, and once in space you will face a fierce inter-planetary battle in your fighter craft ...

CONTINUED PLAY

Spectrum owners have a continued play option. When you have conquered the third planet, and seen off the final space attack that follows it, Galactic High Command will congratulate you on your success. If you want to start playing from the start again then press 'ENTER'. But if you wish to go on to face the Federation again retaining your high score, etc, then simply press 'C'. You will find yourself more vulnerabe each time around, so be more and more cautious - but see how high a score you can get without failing in your mission!
