When all of the containers have been destroyed the building's security system will collapse and the airlocked exit will open allowing you to escape deeper into the complex.

There is a time limit of about 2 minutes to complete the mission in each building otherwise the security system will detect your presence and drain all oxygen from the building killing intruders.

Every 5th building within the complex contains the rebel's nuclear weapons. These buildings are guarded by a special droid which senses the presence of an intruder, following his exact course taken until it catches and destroys the intruder.

Good luck on your mission as the whole of Sentinel 4 is depending on you.
