Cyber Cycles™

CYBER CYCLES

Operators Manual

IT IS THE RESPONSIBILITY OF THE OPERATOR TO MAINTAIN CUSTOMER SAFETY AT ALL TIMES, AND IT IS IMPERATIVE THAT THE DETAILS SET OUT IN THIS MANUAL ARE FOLLOWED PRECISELY.

SAFETY WARNING

In Order to Use This Machine Safely

In order to use this machine safely, be sure to read this Operators Manual carefully before installation and use of the machine.

Whenever the owner of this machine entrusts disassembly, installation, adjustment, routine maintenance or trouble shooting to another person, the owner should ensure that they read the appropriate precautions and relevant sections of this manual before starting work.

In order that no accidents occur when the machine is in operation, strictly follow the notes on safety described below. Also, carefully read [section 3](#), “Precautions”.

Warnings for Operation

- NOTE:** Only operate this machine after checking that it has been installed correctly and in accordance with the manual.
- NOTE:** Parts of this machine move during game play, so there are places where the distance between the stationary section and moveable section changes. There is a warning sticker that the player must be able to reach the grey matting of the cycle base with their feet, however if the operator feels that a customer playing the game is in any danger, he should warn the customer accordingly.
- NOTE:** The warning sticker must always be kept in good condition and replaced if worn so that the customer can read it clearly.
- NOTE:** **If there is an error or problem with this machine, operation must be stopped immediately.**

Warnings for Disassembly, Installation, Routine Maintenance and Troubleshooting

- DANGER:** Namco Ltd. bears absolutely no responsibility for accidents or injuries resulting from unauthorized changes to the machine.
- DANGER:** Ensure that the machine has been turned **OFF** before making adjustments or carrying out maintenance. Also ensure only qualified personnel carry out maintenance or turn the power **ON** to this machine.
- DANGER:** The power supply and inside the monitor will remain hot and have areas of high voltage even though the machine has been turned OFF, and there is a possibility of burns or electric shock. Be careful not to touch these areas.
- DANGER:** In order to avoid injuries due to mis-operation, be sure that the voltage of the power supply is within the prescribed limits. Also to prevent possible electric shocks due to failure, this machine **MUST** be fitted with a securely connected earthed plug.
- NOTE:** Do not turn the main power switch **ON** until the machine has been installed correctly.

1. SPECIFICATIONS

POWER SUPPLY :-	220/240volts AC
MONITOR :-	Hantarex 28" Polo with Auto Degauss
COIN ACCEPTOR	Mars CashFlow - 4 Channel

DIMENSIONS :-

Assembled	1700(w) x 1970(d) x 2100(h)
Monitor Cabinet	800(w) x 750(d) x 1530(h) ea.
Tower	500(w) x 710(d) x 1800(h)
Bike Assy	910(w) x 1370(d) x 930(h) ea.
Header	1450(w) x 240(d) x 500(h)

WEIGHT :-

Assembled	425kg
Monitor Cabinet	95kg ea.
Tower	80kg
Bike Assy	65kg ea.
Header	25kg

ACCESSORIES :-	Keys:	(Cash Door) 2
		(Coin Door) 2
		(Service Door) 2
	Number Decal Set 1-4	2
	IEC Mains Lead	1
	Link Cable	1
	Operators Manual	1
	Monitor Manual	1

	M8x40 Security Screw - SUS	8
	M8x20 Security Screw - SUS	4
	M8x16 Security Screw - SUS	8
	M8 Flat Washer - SUS	20
	M8 Spring Washer - SUS	20
	M5 Security Wrench	1
	M6 Security Wrench	1
	M8 Security wrench	1

2. MAJOR COMPONENTS

3. PRECAUTIONS

Be sure to read this section carefully.

3-1 Notes on Operation

- NOTE: Only operate this machine after checking that it has been installed correctly and in accordance with the manual.
- NOTE: Parts of this machine move during game play, so there are places where the distance between the stationary section and moveable section changes. There is a warning sticker that the player must be able to reach the grey matting of the bike base with their feet, however if the operator feels that a customer playing the game is in any danger, he should warn the customer accordingly.
- NOTE: The warning sticker must always be kept in good condition and replaced if worn so that the customer can read it clearly.
- NOTE: Ensure customers do not get hurt by leaning or climbing on the cycles. Be especially careful in the case of young children.
- NOTE: **If there is an error or problem with this machine, operation must be stopped immediately.**

Parts of this machine lean to the left and right during game play. In **order to maintain the customer's safety**, the operator should strictly follow the appropriate precautions.

3-2 Cautions When Transporting.

- a. Do not subject the game to physical shock when transporting or moving it.
- b. Always return the levellers to the UP position before moving the machine, even for short distances.
- c. The main cabinets, bike assemblies, coin assy and header assy **must** be separated before moving or shipping.
- d. Take care not to rope any moulded (plastic) parts when transporting.

THIS MACHINE IS NOT DESIGNED TO BE MOVED BY FORK LIFT. DO NOT USE

3-3 Cautions When Installing.

1. This machine is designed for indoor use only. **Do Not** install the machine in the following places

① Outdoors.

② Direct sunlight, places with excessive humidity or dust, places where there is water leakage, near air-conditioning or heating equipment, places with excessively high or cold temperature.

③ Places where it would be in the way of emergency exits or fire extinguishing equipment.

④ Unstable places or places with excessive vibration.

⑤ Places that are not level.

2. If this machine is installed next to walls or other machines, ensure that there is plenty of space between them.

NOTE: In order to gain access to the mains-in connector, ON/OFF switch and link switches, make sure that the rear of the machine is separated from a wall or other machine by a distance of at least 500mm or more.

3-4 Cautions when Handling.

<u>DANGER</u>	The Mains Voltage to this machine must be within the range of 220v to 240v AC.
<u>DANGER</u>	Be sure that the power is turned OFF when replacing parts and connecting/disconnecting connectors.
<u>DANGER</u>	To prevent possible electric shocks due to failure, this machine MUST be fitted with a securely connected earthed plug.
<u>DANGER</u>	The monitor and power supply contain areas of very high voltage. Be extremely careful when inspecting or making adjustments.
<u>DANGER</u>	When unplugging the game from an electrical outlet, always grasp the plug, not the mains lead.

NOTES:

- Always return PC Boards to your dealer for repair. Never test the PCB for continuity with a multimeter or similar device. The PCB contains sensitive devices which could be damaged or even destroyed by the internal voltage of such test equipment.
- Adjustments are required after replacing the game PCB, ROM or control pots. Adjustments should be performed as described in [section 7-4](#), "Adjustments when Replacing Parts" (page 25).
- After initial installation or if the number of machines linked together changes, it may be necessary to use the test mode to change the settings and link switch settings. ([Refer to section 6-4](#), "Linking Two Machines" (page 20).

4. INSTALLATION

*Note:- The monitor cabinets and tower are supplied already assembled.
The following instructions are for information only.*

4-1 Assembling the Monitor and Tower Assemblies

1. Connect the loom connectors between the tower assembly and the monitor assembly, and place the assemblies together, taking care not to trap any wires.
2. Fit, finger tight, three M8x20 Security Screws, Spring and Flat washers to connect the tower and monitor base.
3. Fit, finger tight, four M8x20 Security Screws, Spring and Flat washers to connect the monitor cabinet connector cover to the tower.
4. Tighten fully all the Security Screws. (7off)
5. Repeat above for the other monitor cabinet.

4-2 Connecting the Bike Assemblies to the Cabinets

1. Connect the connectors between the bike assembly and cabinet.
2. Place the bike assembly onto the support bracket and push the bike against the cabinet taking care not to trap any wires.
3. Fit, finger tight, the 4off M8x20 security screws, spring washers and flat washers, securing the Bike Assy to the Monitor Base.
4. Fit, finger tight, the 2off M8x20 security screws, spring washers and flat washers, securing the Bike assy to the support bracket.
5. Tighten fully all the security screws. (6off)
6. Fit the bike number decal to the rear of either side of the bike.
7. Remove the shipping bolts (M8x75) from either side of the bike.

Note:- Retain the shipping bolts in a secure place for re-fitting if the machine is transported.

4-3 Fitting the Header Assembly

The Header Assembly is heavy (approx. 25kg), with a forward centre of gravity, so it is important that at least two people are used to fit or remove the Header Assembly.

The fitting position of the Header Assembly is very high, and it is important that a means of reaching the height safely, without stretching, is available. (e.g. steps, step stools etc.)

1. Place the Header Assembly on to the tower and pass the connectors in to the tower, slide the header back ensuring that the rear bracket engages fully in to the retaining brackets.

2. Fit the 8 off M8x16 Security Screws, Spring and Flat washers to retain the Header Assembly to the Tower.
3. Connect the connectors inside the monitor cabinet.

NOTE:-

When the machine is fully assembled and in its final position, lower the 14 level adjusters, (4 on each monitor cabinet, 2 on the tower and 2 on each bike assy), with a spanner so that all castors are raised from the floor, and the machine is level.

Tighten the lock nuts with a spanner to ensure that the level adjusters do not move.

5. How to Play

This game is linkable so players can compete against each other on the same track, or compete against computer bikes when playing alone. Two machines can be linked together allowing up to four players to compete against each other.

The Header Assembly displays the position of each rider and also the leading rider.

Speed is controlled by use of the throttle and brake, and steering is controlled by leaning the bike left or right.

After the insertion of a coin/s, credit is established to a bike position with the use of the respective 'Credit Available' button. Pressing the flashing 'View Change' button, located on the handle bar assembly, will display the Course Select Screen. There are two courses available, "GREEN HILL" is a practise course for beginners and "NEO YOKOHAMA" is an intermediate and advanced course. In a linked game the course is decided by the majority.

Next select a bike.

Each player can select one of three bikes:-

"ANTHIAS", for beginners. It corners easily, and its top speed is reduced a little.

"NVR750R", for intermediate. This bike has good cornering balance, and its top speed is normal.

"WILD HOG" for advanced. By controlling the special drift, it can cover the course faster than any of the other bikes, but is more difficult to control.

The first player to enter "Bike Select" is also able to select, by using the throttle, the music during the game. The title is displayed in the lower left of the screen.

Players can join in a linked game during the link time countdown. This time can be adjusted in the 'Game Options' mode.

If a linked game is in progress but a bike position is available, a player can use this position as a solo game.

When a player completes the specified number of laps in the given time, they complete the game. If the countdown timer reaches 00 before completing the specified number of laps the game is over. At the end of the game, the players ranking, fastest lap time and total time are displayed.

If a best time is beaten the end of the race will be shown and the player can enter their initials by leaning the bike to select the letters and pressing 'View Change' to enter them.

With this game it is possible to change the players viewpoint of the game. Each time the 'View Change' button is pressed the view changes between : "Pillion View", "Rider's View", and "Behind View".

6. ADJUSTMENTS

6-1 Turning on the Power

After the machine has been installed, turn ON the power. The power switch is located on the rear of the right hand cabinet.

6-2 Adjustment Switches

The Adjustment switches are located inside the coin door.

1. Service Switch.
Press this switch to obtain game credits without incrementing the play meter.
2. Test Switch
Slide the test switch ON to enter test mode.
Test mode allows testing and the changing of game settings. (Refer to section [6-3 "Test Mode"](#) (page 12))

Service Bracket

6-3 Test Mode

1. Open the coin door and slide the test switch "ON". The menu screen will be displayed on the monitor.
2. Select the test required by leaning the bike left or right. The selected test will 'blink'.
3. Enter the selected test by pressing the 'View Change' push button. Select "EXIT" to return the "Menu Screen".
4. After testing is completed, ensure that the test switch is returned to the "OFF" position to return to normal game mode.

The Test Switch must always be in the "OFF" position for normal game mode.

NOTES

- The game difficulty and number of laps and entry time must be set the same on all positions that are linked.
- The ID number of the bike furthest left (when facing the front of the machine) should be set to 1, and the other bikes set to 2, 3, or 4 in order from left to right. The ID number of the farthest right position should equal the number of bikes linked.
- Settings other than those described will cause the machine to operate incorrectly.

ITEM	DESCRIPTION	FACTORY SET
(a) Game Difficulty	A (easy) to C (hard)	B
(b) Green Hill	Number of laps for Green Hill course - - - set 2 - 5	3
(c) Neo Yokohama	Number of laps for Neo Yokohama course - - - set 1 - 5	2
(d) Entry Time	A (longest) to C (shortest)	B
(e) ID Number	Sets bike identity for linked positions. Set so that no linked bikes have the same number	
(f) Displays Link Information	Machine Linked - Display will show - LINK ON + number of linked units	
	Faulty Link Cable - Display will show - LINK OFF	
	Only one machine - Display will show - ON 1	
	Faulty Link PCB - Display will show - NG	
(g) Seat Colour	Sets the bike colour. Set to match the colour of bike in use	
(h) Language	Japanese, English, None	English
(i) Sound in Attract	On / Off	On
(j) Hi Score Initialize	On / Off	Off

6-3-3 I/O Test

1. Select item (3) "I/O Test" on the menu screen to test the switches or lamps.
2. Lean the bike left or right to select the required item then press View Change.
3. Select "EXIT" and press 'View Change' to return to the menu screen.

- (a) Shows condition of DIP SW 4 on the PCB. In normal operation all switches are OFF. (If a switch is ON, it will be displayed in red.)

Switch 1 if ON will force the PCB in to Test Mode.

Switch 8 if ON will freeze the picture on the monitor.

- (b) Shows if the game is linked.

6-3-3-1 Switch Test

1. Select Switch Test from the 'I/O Test' menu. The following screen will appear on the monitor.

SWITCH TEST

TEST SW	ON(a)
COIN SW	ON(b)
SERVICE SW	ON(c)
BANK	00 CENTRE(d)
THROTTLE	00(e)
BRAKE	00(f)
VIEW-SW	ON(g)

BRAKE+THROTTLE: EXIT

2. The word 'ON' will appear next to items a, b, c, and g each time the respective switch is operated.
When the bike is pushed left, 'CENTRE' will go off and 'OK' appear just before it reaches the extreme left, '00' will decrease. When the bike is pushed right, 'CENTRE' will go off and 'OK' appear just before it reaches the extreme right, '00' will increase.
When the THROTTLE or BRAKE are operated, 'OK' will appear just before they are fully on, and '00' will increase.
3. Operate the brake and throttle together to exit and return to the 'I/O Test' menu screen.

6-3-3-2 Motor Test

This test is not used on this machine

6-3-3-3 Lamp Test

1. Select Lamp Test from the "I/O Test" menu. The following screen will appear on the monitor

LAMP TEST

WHITE WINDOW (M)
WHITE WINDOW (L)
INTERLACE PATTERN
VIEW ANGLE ADJUST (CRT)
VIEW ANGLE ADJUST (PROJECTOR)
FULL WHITE
EXIT

BANK :CHOOSE
VIEW-SW :ENTER

3. Lean the bike to select a test and press 'View Change' to enter the test and to return to "Monitor Menu" from a test.

6-3-6 ADS Data

1. Select item (5) "ADS Data" on the menu screen to view machine history details.
2. The following screen will appear on the monitor.

ADS

POWER ON	00'00"00 (a)
PLAY TIME	00'00"00 (b)
PLAY TIME AVE	00'00"00 (c)
PLAY NUMBER	0000 (d)
COURSE-VIEW	 (e)
COURSE-BIKE	 (f)
COURSE -LINK	 (g)
COURSE-C. P.	 (h)
COURSE-P.T.	 (i)
INITIALIZE	 (j)
EXIT		

BANK :CHOOSE
VIEW-SW :ENTER

Item	Description
(a) Power On	Total time in hours, minutes, seconds machine has been switched on.
(b) Play Time	Total time in hours, minutes, seconds that machine has been in play.
(c) Play Time Ave	Average time of game duration.
(d) Play Number	Total game plays.
(e) Course-View	Time for each view.
(f) Course-Bike	Number of times a bike has been selected.
(g) Course-Link	Number of linked games played.
(h) Course-C.P.	Position on the course at game over.
(i) Course-P.T.	Total time each course has been played.
(j) Initialize	Reset all data.

6-3-7 Others

1. Select item (6) "Others" on the menu screen.
2. On entering 'Others' the following screen will appear on the monitor.

OTHERS

AUTO SETTING (a)

BACK UP MEMORY INITIALIZE (b)

PCB TEST (c)

EXIT

BANK :CHOOSE

VIEW-SW :ENTER

Item	Description
(a) Auto Setting	Will adjust all linked units to match automatically.
(b) Back Up Memory Initialize	Reset all ADS data
(c) PCB Test	For testing the Game PCB

- a) If the game is linked, this option allows all linked positions to be set from position No. 1 bike. If all game and coin options shown on No. 1 screen are correct, select transmit, then push View Switch. All positions will automatically update to the displayed options and ID No. All screens will display the Auto Setting screen. Set each bike colour from each Auto Setting screen.

Note: Any game in play will be lost during Auto Setting transmit.

6-4 Linking Two Machines.

Up to two machines (4 bikes) can be linked together.
The machines should be linked as described below.

- 1) Ensure that the power is "OFF".
- 2) Loosen the two screws (M5x12) on the back of the right monitor cabinet, and remove the connector cover.

- 3) Set the link switches to "ON", "EXT", and "ON". (See Diag.)
- 4) Use the supplied link cable and connect the machines between "IN" and "OUT" sockets (See Diag.)

[Examples of Linked Machines]

- a) 2 Machines
(2 Seats)

- 5) Turn the power to each machine "ON", and set the PCB ID using the test mode.
(Refer to section 6-3-7, "Others" 'Auto Setting' (page 19))

Note: Settings other than those described will cause the machine to operate incorrectly.

6-4-1 Setting the Link Switches

The link switches are used to set the connection between bikes and machines.

- 1) Slacken two screws (M5x12) and remove the link cover.

- 2). Setting only one machine. (2 Bikes)

Set the link switches to "ON", "INT", and "ON".

Note: Do not use a link cable.

- 2) Setting two or more machines. (4 Bikes)

Set the link switches to "ON", "EXT", and "ON".

- 3) The link procedure is now complete.

- 4) Setting for faulty PCB.

If the game PCB of only one side is faulty, set the link switch on that side only to "OFF"

7. MAINTENANCE

DANGER: In order to prevent injury or electric shock to service personnel, ensure that the MAIN POWER IS OFF before attempting any maintenance.

DANGER: Before performing any work not described in this manual, be sure to contact your distributor to receive instructions or answers to questions.

7-1 Replacing the Fluorescent Tube, Position, and Leading Driver Lamps

- 1) Remove the three security screws (M5x12), and remove the plexi upper retaining bracket.
- 2) Remove the three security screws (M5x12), and remove the plexi lower retaining bracket.
- 3) Remove the header plexi.
- 4) Unscrew the defective position lamp and replace.
Warning:- Ensure that the lamp is **not hot** before touching it.

7-2 Replacing the Signal Lamps

- 1) After removing the front Plexi as above remove five security screws (M5x12), and remove the signal plexi L or R.
- 2) Unscrew the defective lamp and replace.
Warning:- Ensure that the lamp is **not hot** before touching it.

7-3 Handle Bar Assembly

Remove four M5X12 security screws, and remove handle bar assembly cover to gain access to the throttle and brake controls.

NOTE:- The game must be re-initialized whenever the PCB, ROMS, Throttle, Brake or Steering controls are replaced. (See 7-4 "Adjustments when Replacing Parts")

7-3-1 Replacing the Throttle Control Pot

- 1) Slacken the grub screw M3X5 securing the control pot shaft to the drive gear, and remove the gear.
- 2) Replace the control pot ensuring that the the pot is replaced in the same position, and the wires are replaced to the correct terminals.
- 3) Turn the control pot shaft until the flat is vertical and to the right, when looking at the shaft. Replace the drive gear ensuring that the control pot shaft does not turn and the grub screw in the drive gear is on the flat of the shaft
- 4) Re-tighten the grub screw M3x5

7-3-2 Replacing the Brake Control Pot

- 1) Slacken the grub screw M3X5 securing the control pot shaft to the brake assembly.
- 2) Replace the control pot ensuring that the pot is fitted in the same position, and the wires are replaced to the correct terminals.
- 3) When replacing the control pot, ensure that the flat on the control shaft is in line with the grub screw.
- 4) Re-tighten the grub screw M3x5.

7-3-3 Replacing the Steering Control Pot

- 1) Remove three security screws (M5X16) and four security screws (M5x12) from the right hand bike vac-form, and remove the vac-form.
- 2) Slacken the grub screw (M4x5) to release the control pot shaft.
- 3) Replace the control pot, ensuring that the pot is replaced in the same position and the wires are fitted to the correct terminals.
- 4) Re-tighten the grub screw (M4x5), ensuring that it engages the flat of the control pot shaft.
- 5) Refit the bike vac-form, and the security screws (M5x12) (M5x16).

7-4 Adjustments When Replacing Parts (Initialization)

The following adjustments must always be carried out after replacing the Game PCB, ROMS, or Throttle, Brake, and Steering Control Pots.

The game will not operate correctly if these adjustments are not made.

1. Ensure that the Throttle and Brake are fully released and the bike is in its central upright position.
2. Turn the Test switch on while pressing the Service switch.
3. Adjustment is complete when the screen displays 'Initialize Completed'.
4. Operate the Brake and Throttle together to return to the "Menu Screen".
5. Turn the Test switch OFF to return to normal game mode.

Note:- If the 'View Change' button is flashing during standby mode, there is a problem with one of the control pots (Throttle, Brake, or Bank) not being at zero.

Enter 'Switch Test' ([See 6-3-3-1 'Switch Test' page 16](#)) to determine which pot is not at zero and either replace if faulty or reinitialize.

	MONITOR VAC-FORM DECAL - YELLOW	40000250
	MONITOR VAC-FORM DECAL - BLUE	40000251

ITEM	DESCRIPTION	PART No
1	FRONT ACRYLIC RETAINING BRACKET	45000535
2	FRONT ACRYLIC	30000039
3	FLUORESCENT TUBE 18" 15w	64500009
4	CHOKE 240v 15w	63300000
5	STARTER	63000000
6	COIN TOWER SAFETY DECAL	40000254
7	'CREDIT AVAILABLE WHEN LIT' PUSHBUTTON ASSY	60200215
8	ADJUSTABLE FOOT M16x75mm	25000009
9	SWIVEL CASTOR 75mm	59000005

ITEM	DESCRIPTION	PART No.
1	PCB SERVICE DOOR	45000547
2	PCB ASSY - CYBER CYCLE - V151	XCYB-PCB
3	SMPSU 5w/30A 12v/5A	83000004
	1 1/4" FUSE 2A SLO-BLO	63500506
	1 1/4" FUSE 3A SLO-BLO	63500547
	1 1/4" FUSE 2A Q/B	63500504
4	SCHAFFNER MAINS INPUT ASSY	66000016
	20mm FUSE 5A Q/B	63500601
	SCHAFFNER BOOT	66000017
5	LINK PCB ASSY	XAD-LINKPCB
	LINK COVER BRACKET	45000550

ITEM	DESCRIPTION	PART No.
1	RACE START VAC-FORM - LHS	45000452
2	TOP ACRYLIC RETAINING BRACKET	45000537
3	3ft FLOURESCENT TUBE	64500013
4	RACE START VAC-FORM - RHS	45000453
5	E14 25watt GOLF BALL LAMP	64000084
7	TOP ACRYLIC	30000040
8	E14 25watt REAR SILVERWED LAMP	64000083
9	SHORTY BUSHING - 50mm	39000051
B1	M5x16 SUS SECURITY BUTTON HEAD SCREW	26300032

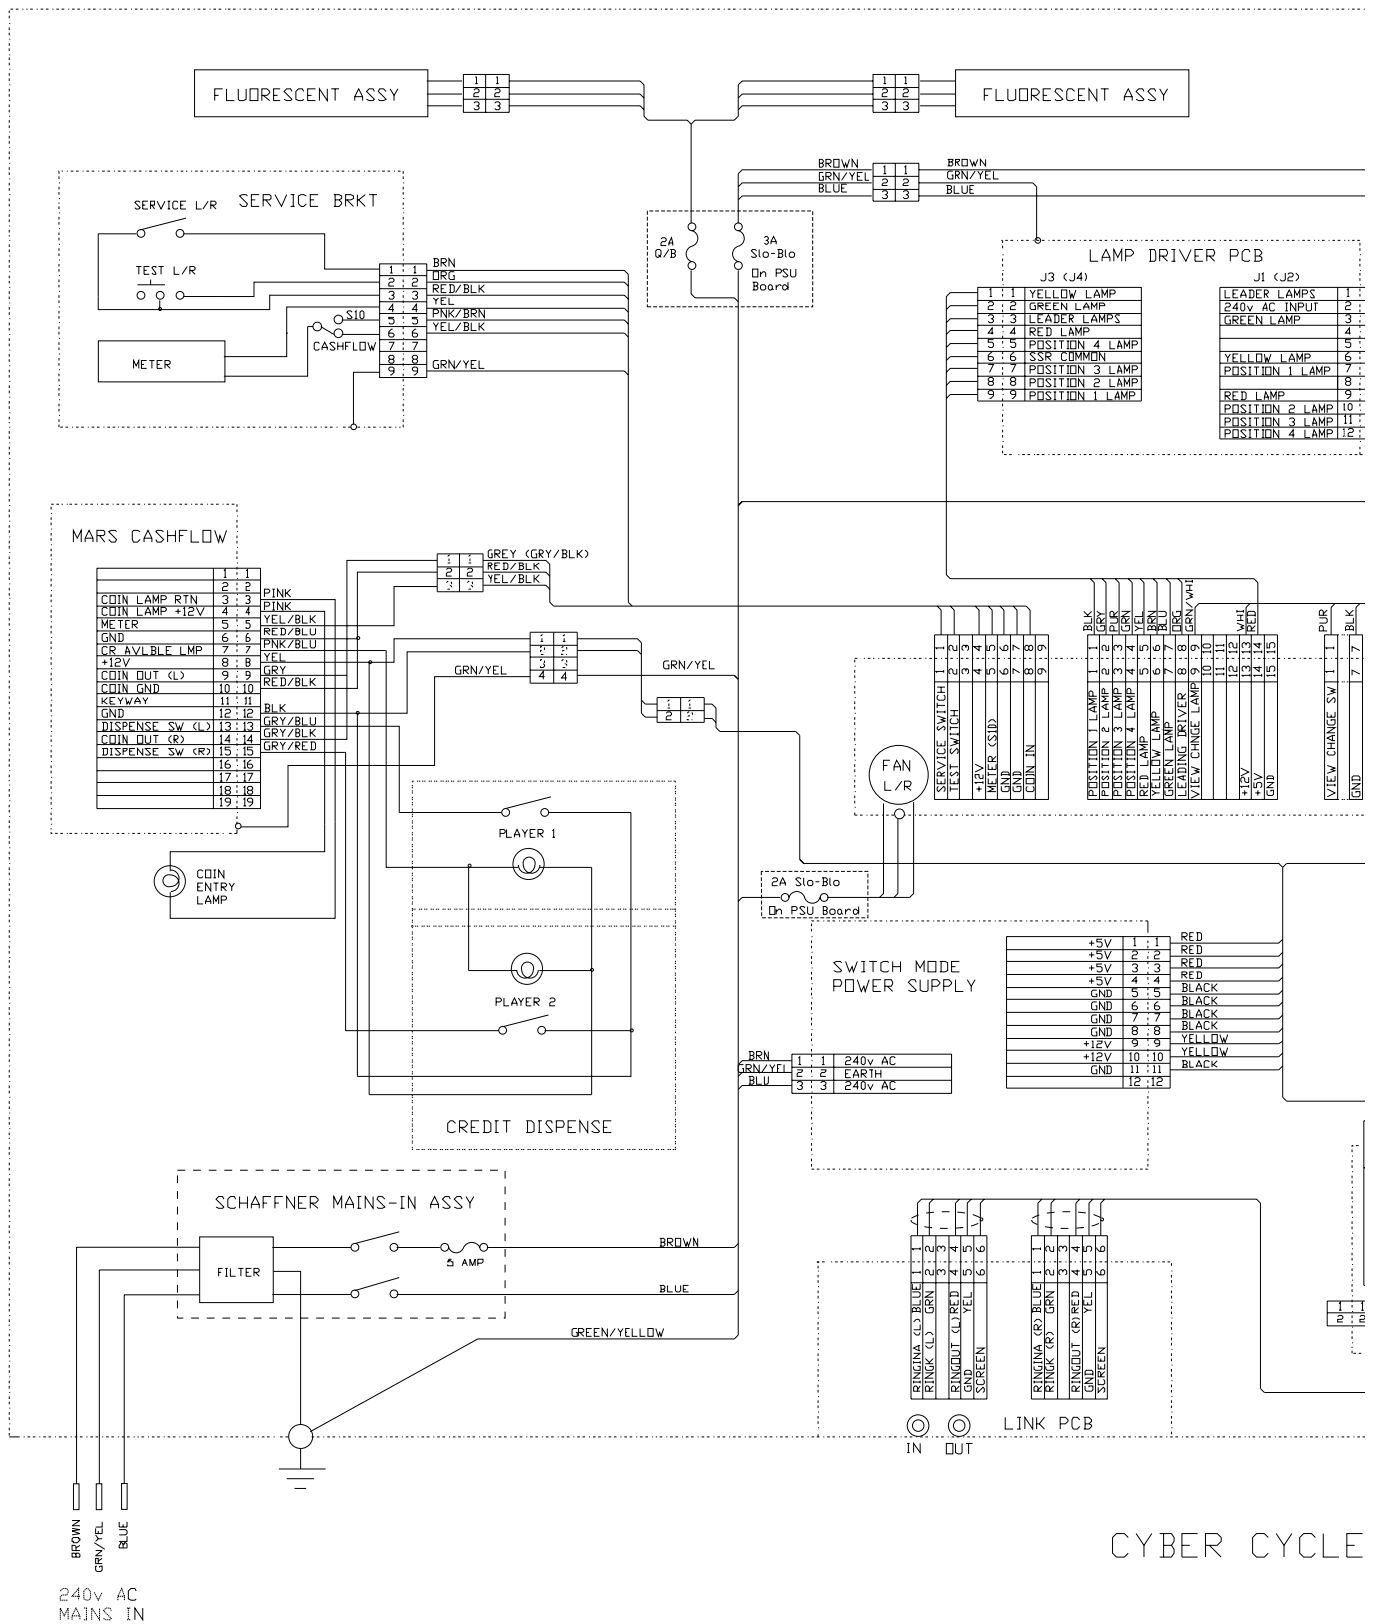

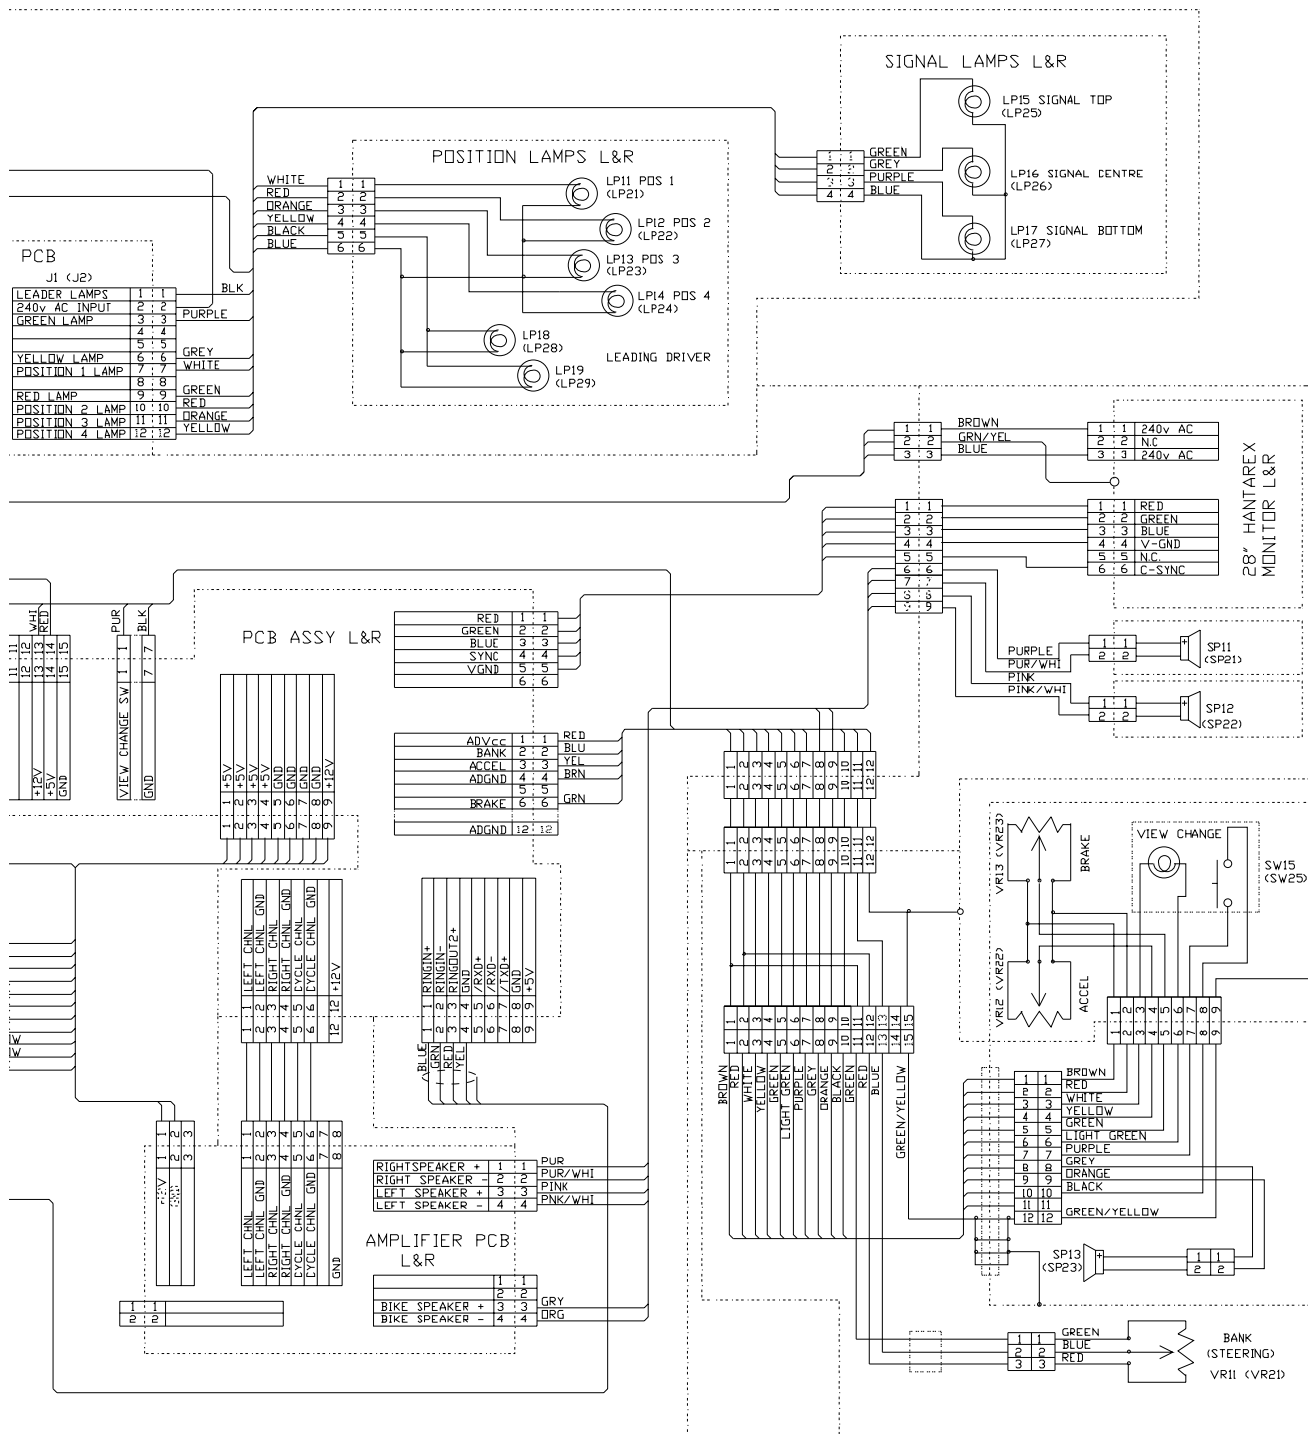

ITEM	DESCRIPTION	PART No.
1	CYCLE BASE FRAME	45000488
2	BEARING MOUNTING ASSEMBLY	45000492
3	ROCKER PLATE	45000494
4	ROTARY MOULDING SUPPORT BRACKET - LHS	45000515
5	ROTARY MOULDING SUPPORT BRACKET - RHS	45000516
6	ROSTA BRACKET	45000497
7	CONNECTOR COVER	45000491
8	EVA FLOOR MAT - GREY	45000489
9	POTENTIOMETER BRACKET	45000498
10	SPACER	45000499
11	SPACER	45000495
12	SPACER	45000496
13	ROTARY MOULDING - BLACK	45000501
	ROTARY MOULDING - RED	45000502
	ROTARY MOULDING - YELLOW	45000503
	ROTARY MOULDING - BLUE	45000504
14	LOWER VAC-FORM RHS - BLACK	45000505
	LOWER VAC-FORM RHS - RED	45000506
	LOWER VAC-FORM RHS - YELLOW	45000507
	LOWER VAC-FORM RHS - BLUE	45000508
15	LOWER VAC-FORM LHS - BLACK	45000509
	LOWER VAC-FORM LHS - RED	45000510
	LOWER VAC-FORM LHS - YELLOW	45000511
	LOWER VAC-FORM LHS - BLUE	45000512
14	4 $\frac{1}{2}$ " 20w SPEAKER	62000006
16	SEAT VAC-FORM	45000513
17	END OF STROKE BUMPER	88300634
18	PILLOW BEARING - FYH / UPC 207	88300633
19	ROSTA SPRING - DR-S27 X 100	XEH09-261-- 262
20	SWIVEL CASTOR 65mm	59000002
21	ADJUSTABLE FOOT M16x95	88300079
22	NAMCO LOGO - ROTARY MOULDING	40000238
23	NAMCO LOGO - VAC-FORM	40000236
24	AIR INTAKE DECAL FRONT - LHS	40000241
	AIR INTAKE DECAL FRONT - RHS	40000242
25	AIR INTAKE DECAL SIDE - LHS	40000243
	AIR INTAKE DECAL SIDE - RHS	40000244
26	CYBER CYCLES LOGO VAC FORM	40000237
27	REAR DECAL ROTARY MOULDING - LHS	40000239
	REAR DECAL ROTARY MOULDING - RHS	40000240
28	CHROME DECAL REAR UNDERSIDE	40000245
29	CHROME DECAL SIDE - LHS	40000246
	CHROME DECAL SIDE - RHS	40000247
30	SUS 430 FLOOR MAT COVER BRACKET	450000490
31	FILLER CAP VAC-FORM	X61700626
34	CYCLE BASE SAFETY COVER - REAR	40000262
35	CYCLE BASE SAFETY COVER - LHS/RHS	40000263
36	POTENTIOMETER	X00800023

ITEM	DESCRIPTION
1	HANDLE BASE
2	GRIP SHAFT (A)
3	GRIP SHAFT (B)
4	THROTTLE STOPPER
5	THROTTLE SPRING
6	WASHER PLATE
7	THROTTLE GEAR
8	BRAKE PIN
9	BRAKE STOPPER
10	STOPPER ROD
11	UPPER BRAKE PLATE
12	BRAKE SPRING
13	BRAKE CONTROL POT BRACKET
14	SLIDE PLATE
15	HANDLE COVER
16	DECAL SET
17	RUBBER GRIP
18	SPRING SPACER
19	GRIP SHAFT GEAR
20	FLANGE BUSHING - LFF 2010
21	FLANGE BUSHING - LFF 0705
22	FLANGE BUSHING - LFF 1015
23	FLANGE BUSHING - 80B 2025
24	THROTTLE SPACER
25	BRAKE LEVER
26	BRAKE BASE
27	BRAKE SPACER
28	THROTTLE PIN
29	BRAKE WASHER
30	PUSHBUTTON ASSY
31	POTENTIOMETER
32	'C' CLIP
