

RIVER RAID™

THE RIVER OF NO RETURN

It's a long, long snaking river.
Reports tell us that it never ends. Ever.
Over a thousand bridges.
And twenty thousand enemy
encounters!

Blast battleships. Blow up bridges.
Down dangerous helicopters and jets.
And make sure you have plenty of fuel –
if you're going to survive this mighty
river.

Instructions for the IBM® PCjr

FLIGHT PREPARATIONS

- Set up your computer system. Follow manufacturer's instructions.
- Plug a Joystick into the first Joystick port. (NOTE: Joystick MUST be plugged in before proceeding on to next instruction.)
- Insert cartridge into your computer with power OFF. Then, turn power ON.
- Press "O" on keyboard to select game variation. You may start at bridge 1, 5, 20 or 50. The higher the bridge number, the greater the challenge!
- Press "S" on keyboard to start.
- Press "Esc" key on keyboard to pause. Press again to continue.

Your Jet Fighter banks to the left and right when you move the Joystick left and right. To accelerate, push Joystick forward; to slow down, pull it back. Press either action button to fire missiles. Earn one additional Fighter for each 10,000 points scored.

Fuel is used up at a constant rate, regardless of speed. A siren alerts you when your fuel is low. To refuel, fly over a fuel depot. The farther up the river you fly, the fewer fuel depots you'll find.

FLIGHT PLAN

The river is divided into sections. A bridge marks the end of each section, and is a good way to measure your progress. For the greatest survival, learn the river by pinpointing areas with the highest enemy concentration, **and** the most fuel depots.

Fuel is critical. When you're far up the river, fuel becomes scarce. Therefore, flying to the next fuel depot should be your top priority.

To score higher, you'll find you can actually blow up a fuel depot while refueling.
