PRIMAL RAGE — THE STORY

Eons ago, before humans walked the planet, there was Rage. Life on Earth was complex, as were the instincts of the planet's life-forms. In order to grow and multiply, there was a delicate balance between the desperate need to protect one's own life and the need to feed off the life energy of the others. As these instincts evolved, so did the gods. These gods embodied the spirits of Hunger and Survival, Life and Death, Insanity and Decay, and especially, Good and Evil. They took the form that most suited their needs and fought countless battles on the primordial frontiers of the Earth. Life on Earth slowly multiplied, and the gods became more powerful and their battles more intense. When life had spread to all corners of the Earth, the skies shook and the Earth trembled with the fevered pitch of the god's battles. Dinosaurs were the dominant animals on land, and great forests covered almost all available space. New life forms evolved at a rapid rate, and civilizations emerged.

Then the delicate balance was disrupted. Balsafas, a great wizard from a parallel dimension, recognized the threat Earth would soon pose to the rest of the galaxy. To stop the threat, he planned to destroy the balance between the gods. Lacking the power to kill a god outright, he instead banished one to an isolated rock tomb in the center of the moon. This caused an immediate disturbance in the balance of power, followed by a huge explosion that blanketed the Earth with a huge cloud of volcanic dust. Most of the life on the planet died, and the surviving gods were sent into suspended animation. Now, millions of years later, a meteor collides with Earth, and its destructive fury rearranges the continents and destroys the cities. Humans survive, but technology is wiped out. The fury of the Cataclysm is enough to awaken the imprisoned gods. The gods emerge to find the Earth they knew is gone. It is now the new Urth. The gods are awake, and they are angry. Get ready for Rage!

START/OPTIONS MENU

At the title screen, press the **START Button** to reach the Start/Options Menu. Press the **D-Pad UP** or **DOWN**, then press any button to select one of the following options:

START

When you select this option, you'll reach the game type, where you'll find the following options:

Arcade Game - This option is the game's default setting. Just like the arcade version, players select Dino's and conquer lands for Urth domination.

1 Player Training - Select this option if you want to practice the various bone-crushing moves and dinosaur fighting tactics in the game. When this option is selected, you'll go to the Dino Select Screen (see **DINO SELECT**, pg. 10). Select one of the seven Dinos, then select your opponent.

2 Player Handicap - This option lets you adjust your damage to the level you wish. The default is set at 100%. It can be set anywhere between 50 and 150%. The strategy is to give a less experienced player more power to compete against an experienced player. Experienced players should set the percentage to a lower level, and beginners should set their percentage to a higher level. Press the **D-Pad UP** or **DOWN** to select the percentage for the left or right Player, then press **LEFT** or **RIGHT** to make changes to the strength of your player. As you make changes, the strength of your Dino will be displayed below the percentages.

OPTIONS

Here you can make various changes to your gameplay. At the Options Screen, press the **D-Pad UP** or **DOWN** to move the flashing arrows next to the option you want to change. Press any Button, then press **D-Pad UP**, **DOWN**, **LEFT** or **RIGHT** to cycle through or select the choices. Select "**Done**" or press **START** to exit each option. The options are as follows:

Difficulty - You can set the difficulty level from 1 (easiest) to 16 (most difficult). Default is 10. As you improve your fighting skills, you can set the difficulty level at a higher setting.

Number of Credits - This option lets you to set the game to allow from 1 to 10 game credits (continues). As you improve at Primal Rage, you can set this option to a lower setting and create an even greater challenge.

Number of Rounds - Here you can set the number of rounds you'll fight before the winner is determined. Select 5 for a best three out of five, 3 for a best two out of three, or 1 for a one time winner-take-all rage. If both players have an equal number of wins and tie in the final round, the game will go into Sudden Death. If there is tie in Sudden Death, both players lose the battle.

Round Time - Each bout has a set time in which the winner must be determined. You can set the game's bout time according to the level of challenge you desire. The round time can be set from 30 to 80 seconds in 5 second increments. The default is 55 seconds. As you improve your fighting skills and accomplish quicker kills, you can set this option lower to put the pressure on you and your opponent.

Gore Switch - Select **GORE ON** or **GORE OFF** (default GORE ON). If GORE OFF is selected, there is no blood, eating people or Fatalities. This includes the refuel round that occurs before the Final Battle in the 1 Player Game. Instead of refueling, you will receive an additional 50% power to your Life Blood Bar.

3 Button Pad Configuration - Press the **D-Pad LEFT** or **RIGHT** to cycle through the various choices and make adjustments to your button configuration. The new configuration will be displayed. When you find the setting you like, select **"Done"** to return to the Options Menu.

6 Button Pad Configuration - Press the **D-Pad LEFT** or **RIGHT** to cycle through the various choices and make adjustments to your Button configurations. The Six Button Controller can be configured so that you can make the Z or C Button activate one of three special moves (see your chosen Dino's profile for the special moves). The new configuration will be displayed. When you find the setting you like, select **"Done"** to return to the Options Menu.

Reset High Score Table - Choose either **"Abort!"** or **"Do It!"** (default **"Abort!"**). If you select Do It!, the game will reset the High Score Table. Select **"Abort!"** if you change your mind and want to leave the scores as they are.

Restore Factory Default - Select this option when you want to return all options to their default settings. Choose either **"Abort!"** or **"Do It!"** (default **"Abort!"**). If you select **"Do It!"**, the game will restore to the Factory Default. Select **"Abort!"** if you change your mind and want to leave the settings as they are.

Done - When you've finished making changes, select this option to return to the Start/Options Menu.

DINO SELECT

Here one or two players can then select one of the seven available dinosaurs to fight for Urth domination. In 1 Player mode, you'll face each of the other 7 dinosaurs in their home territory. With 2 Player mode, you'll both battle for Urth domination until one player conquers all lands. After you've selected your game type and set your options, you'll need to select your character. Press the **D-Pad LEFT** or **RIGHT** to highlight the Dino you want, then press the **START Button** to make your selection. A Dino match-up screen will appear, then you'll begin the Rage.

MAIN RAGE SCREEN

Now that the preliminaries are over, get ready to Rage! The main Rage screen displays each dino's name, a red Life Blood Bar, a yellow Brain Stem Bar and a Timer. Various other functions appear on-screen during each Rage. Read the following to familiarize yourself with *Primal Rage*:

RAGE!

Life Blood Bars

Brain Stem Bars

Timer

Win Marker

Hit combos

Life Blood Bar - The red life Blood bar is displayed above your dino's name in the upper right or left side of the screen. This bar diminishes as you take on damage, and the match ends when one Dino's bar has been depleted.

Brain Stem Bar - This yellow bar is located directly above your dino's name and indicates your Dino's brain strength. When the yellow bar is depleted, your Dino will appear dazed and vulnerable- but not beaten. You can snap out of the daze either by moving the **D-Pad** quickly **LEFT** and **RIGHT**, or when your opponent nails you with one of the various moves.

The Timer - There are various time settings you can set your Rage to (see **ROUND TIME**, pg. 8). Each bout is timed. When the timer winds down to 10 seconds, the remaining seconds will begin to beep. This is your warning that the match is about to end. If time runs out before a Dino is beaten, the earth will lift both combatants into the air. The Dino with the most life remaining will win the Rage.

Win Icon - Each time you win a bout, an icon will appear on the winner's side under the timer. Depending on how you have set rounds (see **NUMBER OF ROUNDS**, pg. 8), the winner of the bout will have to accumulate 1, 2, or 3 icons.

Hit Combos - During each rage, Dinos can inflict heavier damage to their opponent with multiple hit combos. The more hit combination moves you connect on, the heavier the damage you'll inflict. When you put a nice hit combo together, it will appear on your side of the screen (left side for Player 1, right side for Player 2).

DOMINATION OF THE URTH

Each time you win a Rage in Normal Game mode, the Urth Screen appears and tells you what portion of the world you have conquered. Continue to win your Rage bouts until you have conquered all lands. Once you have conquered the Urth, your chosen Dino will take on all other Dinos one-at-a-time in The Final Battle Ground (difficulty 10 or higher only). There is no timer, and your Life Blood Bar is not reset, so you'll have to dispose of your enemy as quickly as possible. If you have set the game to allow continues, you may choose to continue the game if your Dino is beaten.

REFUELING

In the 1 Player mode, with a difficulty level of 10 or higher and Gore set On (see **GORE SWITCH**, pg. 9), you will need to refuel your dino for the final battle. This process takes place only after you've defeated all other dinosaurs. To refuel, you will have to eat as many worshippers as possible in 20 seconds.

DINO PROFILES AND MOVES

Read the following profiles to get familiar with each of the dinosaurs available in Primal Rage. Button references in each profile are listed as numbers. Numbers 1 through 4 refer to buttons on your 3 and 6 Button controllers. (See **CONTROL REFERENCE**, pg. 5, for a rundown of D-Pad and controller button descriptions).

Each dino's special move is numbered (e.g. sp. 1). When configuring your controller (see **3 AND 6 BUTTON PAD CONFIGURATION**, pg. 9), refer to the special move's number to configure the special moves.
