TATER TOURNEY

This is a homerun hitting contest. You can play against the computer or against your friends. Up to 8 different players (human or computer) can participate. The pitcher is A.I. controlled and pitches 70-80 mph fastballs right down the heart of the strike zone.

- Highlight the *Tater Tourney* option and press the **C Button**.
- Once in the *Tater Tourney* you will see a chalkboard with all of your options. In this screen the options for the tourney can be selected by clicking on the desired box.
- Number of Contestants: (2 through 8) (other contestants can be human or computer controlled).
- Number of Rounds:* (1, 2, or 3).
- Innings** per Round: (1 through 9).
- Outs*** per Inning: (1, 3, 5, or 10 outs).
- Batting Skill: (*T-Ball*, *Farm*, or *Show*).

After these options have been set, the players can be chosen by selecting *Start*, or choose a stadium by selecting *Stadium*.

* The option for the number of rounds is limited depending on the number of contestants. Two contestants can only play a one round tournament.

** "Innings" refers to the number of attempts the batter will get to step up to the plate.

*** An "Out" is defined as any hit ball that does not clear the fence. Balls and Strikes do not count. A foul ball is an out.

You can choose the stadium where the *Tater Tourney* will take place by highlighting *Stadium* and pressing the **C Button**.

- To view all the available stadiums, simply press the **D-Pad** left or right to cycle through them.
- To switch to the stadiums in the other league, press the **Z Button**.
- To choose a stadium, highlight the *Done* button and press the **C Button**.

After you have set your desired options, highlight the *Start* button and press the **C Button**.

Batter Selection Screen

Now you can select the participants that will slug it out in the *Tater Tourney*.

- You can rotate between the teams by clicking the page flip buttons on either side of the team logo.
- You can switch leagues by pressing the **Z Button**.

Highlight the player you want in the *Tater Tourney* and press the **C Button**.

As soon as you click on a player's name, he goes to the right side of the batter selection screen. You may select all the participants or you may highlight the *Fill* button on the right page to have the computer select the rest of the participants. The default is for the human to have control of all participants. To get any or all of the participants to be controlled by the computer: Highlight one of the selected players on the right page. Press the **C Button**. A red X will appear in the box to the left of the player's name. This red X denotes computer control. The *Clear* button can be used to clear all selections and start from scratch.

As soon as the batter lineup is complete the user can start the *Tater Tourney* by clicking *Begin*.

Should there be a tie between two or more batters after the round is completed, then those batters must compete in a sudden death round with each batter getting three outs. These sudden death overtime rounds continue until the proper number of batters for the next round is determined.

Note: During the *Tater Tourney*, every human contestant uses controller 1.

PRACTICE MODES

There are three different practice modes within *Grand Slam*: *Batting*, *Pitching* and *Fielding*. To get in some practice before taking on the computer or a friend in a real game:

- At the *Main Menu*, choose the *Practice* option and press the **C Button**.
- At the *Practice Menu*, select either *Batting*, *Pitching*, or *Fielding* by choosing them and then pressing the **C Button**.

Batting

You get to choose what skill to bat with. (See the *Skills* description in this manual for explanations of the different skill settings.) Choose if the batter will be left or right handed. Choose the computer pitcher skill level and the arm with which it will throw. Also, choose what pitch type you want to face. You can pick one pitch type at a time or select *Varied* to face a mix of different pitches. To quit practice, press the **Start Button** and choose *Quit*.

Pitching

Here you get to choose the pitch skill and what arm you will throw with. (See the *Skills* description in this manual for explanations of the different skill settings.)

You get to choose if the computer batter will be left or right handed. Choose the computer batter skill level and the type of pitches to practice. Up to four different pitches can be selected at a time. To select a pitch, choose the pitch type and the **C Button**. If you change your mind and want to use a different pitch, choose the pitch you don't want and press the **C Button** again. This will de-select that pitch.

One additional feature is also available in *Pitching Practice* mode. *Tutor* will walk you through the button pressing mechanics of pitching. To select one or both of these features, simply choose the feature and press the **C Button**. Practice pitching as long as you wish. To quit practice, press the **Start Button** and choose *Quit*.

Fielding

Just pick what position you want to practice and press the **C Button**. Someone will hit the ball out to your position. You just have to field it. A short time after you field the ball, another one will be hit out to you. Practice as long as you want. Make sure and try both camera angles available.

These are the many game options that can be set before (or during) gameplay. The following is an outline of the options:

Options: • You can change many general game conditions here by highlighting an option and pressing the **C Button**.

Settings: • Turn the *Wind* on or off
• Turn *Errors* on or off
• Turn *Auto-Fielding* on or off

Auto-Fielding is useful for playing your first couple of games. When the ball is hit by your opponent, your fielders will automatically run to field the ball. Once they catch it, you still must make any throws. NOTE: If you move the **D-Pad** while an auto fielder is on the way to the ball, the *Auto-Fielding* will be terminated for the rest of that play!

DH Rule - Choose when the DH will be in effect

- Park Rules - the DH will be in effect for both teams when games are played at the stadiums of *America's League* teams.
- Always On - the DH will be in effect for both teams when games are played in any stadium.
- Always Off - the DH rule is never in effect.

Signals - Have your catcher suggest a pitch by signaling with 1, 2, 3 or 4 fingers.

- 1 = pitcher's top pitch, 2 = next best pitch, etc.

GAMEPLAY

You can select *View*, *Baserunning* and *Throwing* options here by highlighting the option and pressing the **C Button**.

Baserunning - Select the way you will control your baserunners.

Point to Runner - When moving baserunners, point the **D-Pad** toward the runner you want to control and the *Advance* or *Retreat* button. (Consult the control diagram in this manual for the specific buttons).

Point to Base - When moving baserunners, point the **D-Pad** toward the base you want them to go to and the *Advance* or *Retreat* button. (Consult the control diagram in this manual for the specific buttons.)

View - Select the view in which you will play defense.

Home Plate - This is a traditional view. It is from behind the plate with the camera moving to where the ball is hit. Your fielders will be facing the camera. (*Normal* throwing is probably best for this view.)

Fielder - This is a behind-the-fielder viewpoint. The camera will place itself behind the fielder that has the best chance at fielding the ball. (Forty Helens agree that the *Relative Throwing* is best for this view.)

Throwing - Select the way your fielders will throw the ball.

Normal - Pressing down on the **D-Pad** and the **Throw Button** will send the ball to Home. Pressing left and **Throw** will send the ball to 3rd, up and **Throw** to 2nd, right and **Throw** to 1st.

Relative - This type of throwing is view specific. Depending on where your fielder is, pressing a direction on the **D-Pad** and the **Throw Button** will send the ball in the direction pressed. For example, if the camera is in the *Fielder* view and the 3rd baseman has the ball, pressing the **D-Pad** to the left and the **Throw Button** will send the ball to the left-2nd base, pressing up and **Throw** would send the ball up-1st base.

When in the outfield, the *Relative Throwing* is more like the *Normal Throwing*, except the diamond is flipped. For example, if the Center fielder has the ball and you press up and the **Throw Button**, the ball will go home, to the right and throw the ball to 3rd, etc.

When in the outfield, the *Relative Throwing* is more like the *Normal Throwing*, except the diamond is flipped. For example, if the Center fielder has the ball and you press up and the **Throw Button**, the ball will go home, if you press right and the **Throw Button**, the ball will go to 3rd base, etc.

SKILLS

Choose the skill settings for how you and your human opponent will pitch and bat. (If you are playing against the computer, the skill settings for Batter 2 and Pitcher 2 do not change.)

Batting

T-Ball - The easiest skill setting. All you need to do is time your swing. You don't have to worry about where the ball is in the strike zone. Just swing away! (You can move your batter in toward the plate by holding the **A Button** and moving the **D-Pad** toward the plate.)

Farm - Now you will be required to place the batting cursor on the ball when you swing. The more of the ball covered by the cursor, the harder you will have to hit the ball. Move the cursor with the **D-Pad**. (You can move your batter in toward the plate by holding the **A Button** and moving the **D-Pad** toward the plate.)

The Show - This is the most challenging of the batting skill levels. You have to be really good and have your head in the game to be successful with this skill setting. Instead of just pressing the **C Button** to swing, you have to press AND hold the **C Button** to step into the pitch. You will see a power meter next to the plate. The longer you hold down the **C Button** the higher it goes. When it is at the top you have maximum power. It only stays at the top for a very short time before it begins falling again. This simulates the correct timing of stepping into a pitch. Step in too early and all of your power will be gone before the ball gets there. Step in too late and you will be behind the ball. Step in just right and POP the ball hard. You will have to put the cursor on the ball again in this mode and you can move your hitter toward the plate by holding the **A Button** down.

Pitching

Meat - The least difficult skill level. The needle will sweep slowly and the green accuracy zone will be very large.

Rookie - The needle sweeps a bit faster and the accuracy zone is a bit smaller.

Ace - This is tough. It's just like real pitching. It requires a lot of concentration to be consistent. The needle sweep is fast and the green accuracy zone is tiny.

Note: On all skill levels of pitching, the needle will sweep back faster if you go into the red zone.

SOUND - The volume of music and SFX can be altered.

- 1/3 - Music and SFX will be at 1/3 normal volume
- 2/3 - Music and SFX will be at 2/3 normal volume
- Full - Music and SFX will be at Full normal volume

TROUBLE- PRODUCT SUPPORT

Thank you for purchasing this Virgin Interactive Entertainment product. To get the most out of your game, take advantage of the following product support:

VIRGIN INTERACTIVE ENTERTAINMENT'S AUTOMATED SUPPORT SYSTEM

V.I.E. has continued to improve upon its Automated Support System, available 24 hours a day, 7 days a week. Customer service information and answers to common technical problems are available on this system. Simply dial (714) 833-1999 for assistance at any time. A touch-tone phone is required outside of normal business hours. Many solutions can be obtained in less than four minutes with no waiting necessary.

TECHNICAL SUPPORT

If you need assistance, our technical support team is available to help you. If the answer is not available in our Automated Support System, live technical support representatives are available Monday through Friday from 8 a.m. to 6 p.m. Pacific standard time at (714) 833-1999. **When calling please position a phone near your system. Also, please have a pen and paper handy as you may want to take notes.**

FAX SUPPORT

If you have access to a FAX machine, many technical support documents are available for FAXback through our Automated Support System.

You can also FAX requests for technical support to (714) 833-2001. Please include a complete description of the problem you are having. Also, please include a phone number in case we need to contact you for further information.

ON-LINE SUPPORT

If you have access to the Internet, Virgin offers 24 hour, 7 days a week support through our web site address at <http://www.vie.com>. Customer service information and answers to many technical problems are available on this system.

ORDER LINE

The latest V.I.E. products can be ordered over the phone using your credit card! The toll-free number is (800) 874-4607. This toll-free number is for orders only. If you are unable to call 800 numbers, you can also reach our Order Line by calling (619) 693-1200. The order line FAX number is (619) 530-2225. The International phone order line number is (619) 490-9234.

Please note that the V.I.E. Order Line and Retail Center is not equipped to handle your technical support requests or inquiries. It is a separate, independent facility that is located in another county from the Virgin Interactive Entertainment headquarters. Calling the order line will not expedite your problem handling, and may result in even further delays.

HINT INFORMATION

There are many ways to receive hints for V.I.E. games. Clue Books are available for most major games, and can be found at many software stores or ordered from our direct order line at (800) 874-4607. See above for more details.

V.I.E. also has two automated hint lines, available 24 hours a day. The cost is only \$.95 cents per minute. You must have a touch-tone phone, and be at least 18 years old or have parental or guardian permission before calling. Please be advised that not all V.I.E. products/titles are supported on the hint lines. In the U.S.A., please call (900) 288-4744.
